SUMMARY

Flutter developer since 2024. At Mobil80 I built the EZTrak and XcelAudit mobile apps from scratch and ship their releases to the App Store and Google Play. I founded Zero Fleets after running a small Uber fleet on spreadsheets, and built DayZer0, an AI health coach, on my own. I'm looking for a mobile or product engineering role in a strong team.

EXPERIENCE

Mobil80 Solutions and Services Pvt Ltd · Senior Developer Feb 2025 – present
Bengaluru · Flutter apps for Mobil80's clients and partners

- **EZTrak**, asset tracking by QR code ([App Store](#), [Google Play](#)). Built the Flutter app from scratch, starting in June 2025, on the product's existing AWS Amplify backend (Cognito, AppSync GraphQL, S3), and remain its main mobile developer; the App Store lists 15 releases since September 2025. Cache-first loading with Hive, role-based navigation and QR deep links.
- **XcelAudit**, audit workflows for chartered-accountant firms ([App Store](#), [Google Play](#)). Built the app from scratch, starting in September 2025, and am its only mobile developer. Shipped 2.0.0 (Jan 2026) to 3.1.0 (Aug 2026), including the first App Store release and iPad support. Multi-level sign-off rules, real-time chat on AppSync subscriptions with optimistic sends and a local cache, and push notifications that open the right screen after a cold start.
- **Sportzlytics**, AI coaching reports from sports videos ([Web app](#), [App Store](#), [Google Play](#)). Work across the Flutter app (web, Android, iOS; BLoC, GoRouter), the Flutter Web admin panel and the AWS serverless backend (Lambda, SQS, DynamoDB, Gemini), most recently on email sign-in and WhatsApp account linking.
- **MyPrezence** (staff attendance, live since 2021, 5K+ Google Play downloads): took over the member app in May 2026 and shipped 4.2.0. **RSVP** (networking app, not released): turned a UI prototype into a working app in about 10 weeks, with a WebSocket client for AppSync Events and three languages.

Mobil80 Solutions and Services Pvt Ltd · Gaming café manager Oct 2024 – Feb 2025

- Ran the counter at M80 Esports. On my own initiative I built a Flutter app for device sessions, per-device pricing, snack billing and customer records by phone number. It never launched, but building it is how I moved into development.

First Logic Meta Lab · Flutter developer intern Mar 2024 – Sep 2024

- Flexi-fold Admin, a Flutter Web admin panel for a folding-door business, built by five interns. My parts: dealer and warehouse modules, the catalogue with two-tier pricing, spreading dealer payments across orders, and PDF receipts.

PROJECTS

Zero Fleets · Founder Nov 2025 – Jul 2026

- A fleet management app I built for my own Uber fleet (5 cars, about 15 drivers), then published on both stores ([App Store](#), [Google Play](#)) under Mobil80's developer account. Mobil80 adopted it as a product, and it reached about 40 users. Each settlement between driver and owner is written in one Firestore transaction, and Gemini checks Uber earnings screenshots.

DayZer0 · Founder, solo Jun 2026 – present

- An AI health coach, live on [Google Play](#) under Mobil80's developer account and entered in [RevenueCat Shipaton 2026](#). A cheap Gemini call routes each message and picks the context the coach sees, with test cases I run before changing the router prompt. Chat turns are claimed in a Firestore transaction so a retry never runs twice, and Pro status is read from RevenueCat on the server.

SKILLS

Mobile: Flutter, Dart, GetX, Riverpod, BLoC, GoRouter, Hive
Backend: Firebase (Auth, Firestore, Cloud Functions, Storage, FCM); AWS (Amplify, AppSync GraphQL, Cognito, Lambda, DynamoDB, S3, SAM); Node.js; REST and GraphQL APIs
AI, payments: Gemini (structured output, image and video input), RevenueCat, Razorpay, WhatsApp Cloud API
Shipping: Google Play Console, App Store Connect, Git

EDUCATION

- Professional certification in mobile app development (Flutter), First Logic Institute of Technology, 2024
- BSc Mathematics (Government Arts College, Ooty) and BA Mass Communication (MES Mampad College), both discontinued
